

DAYANAND COLLEGE OF COMMERCE, LATUR

Experiential Learning - 2016-17
Edutainment/Environmental Visit

The college takes initiative in providing different experiential learning platforms to the students. The abilities are developed through actual or on site visit to different service providing industries or production industries. This was very encouraging to the students as they get motivation from these types of visit. We try to visit Banks, Insurance companies, hotels, production industries etc.

Not only industrial visit but also we try to explore our students learning experiences through different educational and environmental tours. Recently we visited **Akluj Water Park & A Educational Institute Established for under privileged class childrens at Yamgarwadi** with our students and they really enjoyed and cherished with this visit.

Yamgarwadi (School for under privileged class children)
