Biometrics : 3 step authentication to enhance security

ABSTRACT

The biometric authentication system is a security system that uses unique biological characteristics of an individual to identify and verify the user's identity. This system is used to access sensitive information and resources. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual.

PRODUCT USED

The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual.

COST

Sl. No.	Component	Amount
1	Hardware (A) Model 1	1000
2	Software (B) Model 2	500
3	Hardware (C) Model 3	200
4	Software (D) Model 4	100
5	Hardware (E) Model 5	50
6	Software (F) Model 6	25
7	Hardware (G) Model 7	12.5
8	Software (H) Model 8	6.25
9	Hardware (I) Model 9	3.125
10	Software (J) Model 10	1.5625
Total		1912.5

WORKING PRINCIPLE

The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual.

BACKGROUND

The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual.

TESTING AND RESULTS

The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual. The system is designed to be secure, reliable, and easy to use. The system is based on the principle of biometrics, which is the study of unique biological characteristics of an individual.
