Experiential Learning Activity

By Dr. A.S. Bhanji

Role Play- Creative Co-ordination Crafting

About Activity: An experiential learning activity was conducted of B.com II E as continuous Evaluation activity for the subject Business Environment with the objective of developing teamwork, coordination, and effective communication skills. The activity combined elements of role play and hands-on crafting to simulate real-world business challenges where collaboration under constraints is essential. In this activity Students were randomly divided into teams to ensure diversity and to simulate real workplace environments where individuals must collaborate with unfamiliar team members.

Each team was given a unique and challenging task:

- Participants were required to **tie one of their hands**, restricting their ability to perform tasks independently.
- Using only one free hand per participant, teams were instructed to **create paper-based rings** within a given time frame.
- The activity demanded **collective effort**, as individual efficiency was limited due to the constraint.

Students had to coordinate roles, manage time, and communicate effectively to successfully complete the task. No external assistance was allowed, encouraging self-reliance and teamwork.

Total Participants: 41

Class & Division: B.com II E

Date: 21.08.2025

Objectives of the Activity:

The primary objective of the activity was to:

- To understand the impact of **environmental constraints** on performance.
- To develop **adaptability** in challenging situations.
- To enhance **team coordination and cooperation**.
- To promote **problem-solving under limited resources**.
- To demonstrate **organizational behaviour in a controlled environment**.
- Provide a practical understanding of **collective effort and leadership dynamics**.

Outcomes of the Activity:

By participating in this activity, students were able to:

- Understand the importance of **team coordination and collaboration**.
- Improve **interpersonal communication and cooperation**.
- Experience **leadership and team dynamics in action**.
- Recognize the value of **collective effort over individual performance**.
- Developed **adaptability and flexibility** in task execution.
- Applied **business environment concepts in a practical setting**.
- Enhanced **decision-making and communication abilities**.

The activity effectively demonstrated the significance of teamwork, coordination, and adaptability in a constrained environment. By engaging in the task with limited resources, students gained practical insights into how real-world business environments operate under various restrictions. The exercise reinforced the importance of clear communication, collective effort, and strategic thinking in achieving common goals. Overall, the activity served as an engaging and impactful learning experience, helping students connect theoretical concepts with practical application while **strengthening essential managerial skills**.
