Experiential Learning Activity

By Dr. A.S. Bhanji

Role Play- Drafting & Crafting

About Activity: An experiential learning activity was conducted of B.com II C & D as continuous Evaluation activity for the subject Business Management with the objective of developing teamwork, coordination, and effective communication skills. The activity combined elements of role play and hands-on crafting to simulate real-world business challenges where collaboration under constraints is essential. In this activity Students were randomly divided into teams to ensure diversity and to simulate real workplace environments where individuals must collaborate with unfamiliar team members.

Each team was given a unique and challenging task:

- Participants were required to **tie one of their hands**, restricting their ability to perform tasks independently.
- Using only one free hand per participant, teams were instructed to **create paper-based rings** within a given time frame.
- The activity demanded **collective effort**, as individual efficiency was limited due to the constraint.

Students had to coordinate roles, manage time, and communicate effectively to successfully complete the task. No external assistance was allowed, encouraging self-reliance and teamwork.

Total Participants: 61

Class & Division: B.com II C & D

Date: 28.08.2025

Objectives of the Activity:

The primary objective of the activity was to:

- Encourage **team spirit and collaboration** among students.
- Develop **coordination and cooperation** in a constrained environment.
- Enhance **problem-solving and adaptability skills**.
- Promote **effective communication within teams**.
- Provide a practical understanding of **collective effort and leadership dynamics**.

Outcomes of the Activity:

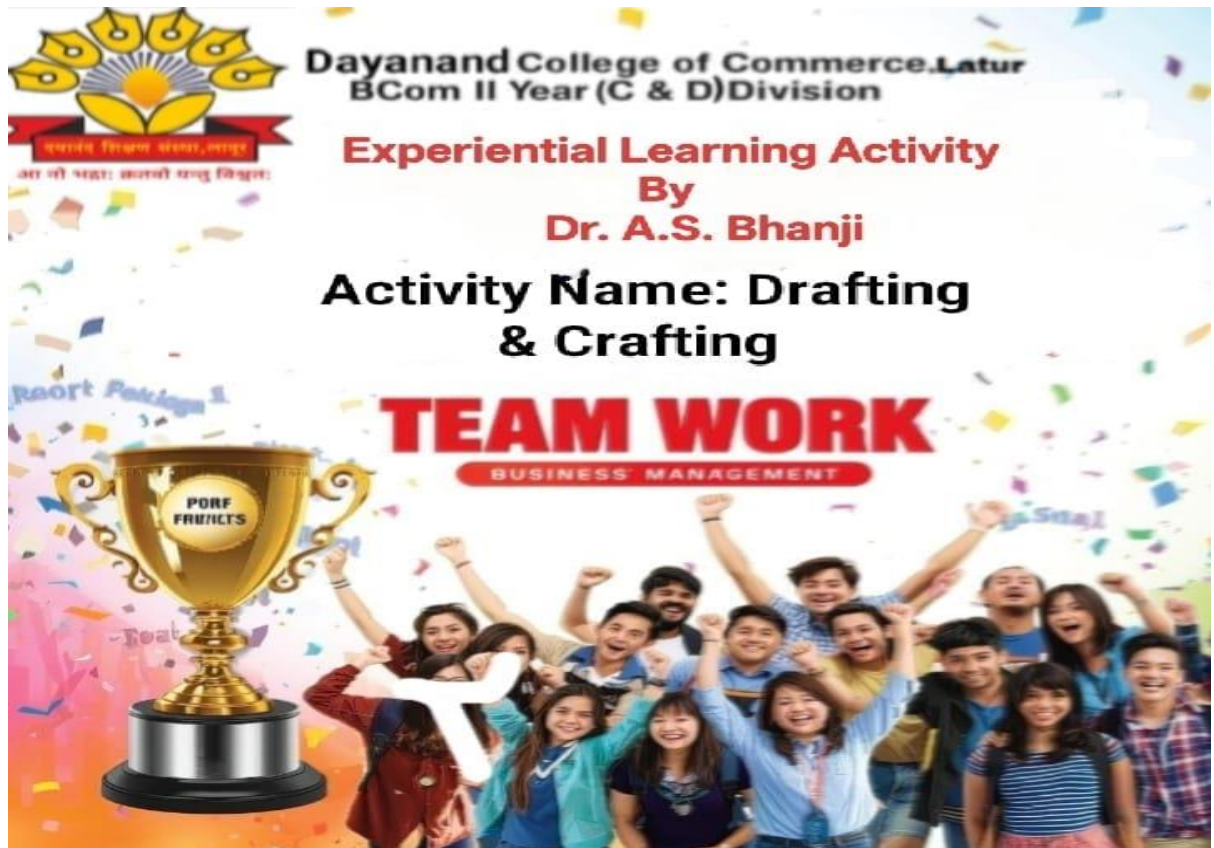

By participating in this activity, students were able to:

- Understand the importance of **team coordination and collaboration**.
- Develop **problem-solving skills under constraints**.
- Improve **interpersonal communication and cooperation**.
- Experience **leadership and team dynamics in action**.
- Recognize the value of **collective effort over individual performance**.

The activity successfully achieved its objective of instilling teamwork, coordination, and communication skills among students. It provided a practical and engaging platform for students to experience real-life business challenges in a controlled environment. The exercise reinforced the idea that success in any organizational setting depends on **effective collaboration, adaptability, and team spirit**.
