13	Purpose/aim/objective and outcome of the event					
	Objectives: - To introduce students to fundamental concepts of data analysis. - To provide practical exposure to commonly used data analysis tools. - To enhance students ability to visualize data using charts, graphs etc, - To train students in applying basic statistical techniques for data analysis. - To promote critical thinking and analytical ability. - To enable students to interpret analytical results. - To promote hands on learning through real-life datasets and case based problem solving. Outcome: - Understand key concepts and terminology of data analysis. - Collect and analyze primary/secondary data effectively. - Apply essential statistical functions for analysing database.					

	▪ Create meaningful data visualization such as bar charts, histogram, etc. ▪ Demonstrate improved analytical thinking skills applicable to academic, research, and professional context.
14	Complete Activity Report (Description) The Department organized the activity on One day Hands on training on Data Analysis to enhance students academic and practical competencies. The activity aimed to develop research aptitude, analytical thinking, and industry exposure, promoting experiential learning. Hands on training session were conducted to explain how to do data analysis while doing research, use of statistical Functions, data visualization, data interpretation. Through this activity, students developed the ability to collect and analyse primary and secondary data effectively, create meaningful data visualization such as pie charts, graphs etc. to make an interpretation of data, draw meaningful conclusions, and prepare systematic academic reports. Their analytical skills, presentation skills, and confidence improved significantly. Overall, this One day Hands on training activity contributed to holistic development of students by strengthening both academic research skills and practical industry readiness.
